

**INCLUDES  
CLUES TO INCLUSIVE  
AND COGNITIVE LEARNING  
ENHANCEMENT IN SCHOOLS**

**European Comenius Network Project**

The INCLUDES project wants to create a network of educational professionals and parents working towards the realization of inclusive & cognitive education.

*Inclusive education* is defined as providing adapted, individually tailored education for all children in peer & age-related groups, across a variety of needs, abilities and levels of competences. It provides the necessary support within the normal classroom. It involves teaching children with learning difficulties (whatever their origin – social or disability) together with “normally” learning children.

*Cognitive education* aims to activate a child’s basic cognitive skills (involved in learning basic academic skills, as well as social, motor, artistic and emotional adaptive learning), in order to develop its capacity to learn how to learn, to find the “clues” of learning. Hence the name IN-CLUES.

The INCLUDES network is being co-financed by the European Commission within the Comenius Programme, from 1 October 2003 until 30 September 2006.
