

A Grounded Theory, az ATLAS.ti és az abdukció kapcsolata a kvalitatív kutatásmódszertanban

SÁNTHA KÁLMÁN¹

Abstract

The study focuses on the theoretical and methodological differences among the Glaserian, Straussian and Constructivist Grounded Theory. It demonstrates the logical connections between the Grounded Theory and ATLAS.ti used for qualitative data analysis then it lays the emphasis on the expounding of the conceptual background of abduction and its applicability in qualitative methodology. Finally it searches for possible connections among abduction and the different trends of Grounded Theory.

Keywords

Grounded Theory, abduction, ATLAS.ti
