**Abstract:** The changed way of life in families, the decrease of the primary socialising function of the family is giving school education such new challenges which are overpassing the capacity and competency of our schools and teachers. The school psychologist, school counselor will have the mission to efficiently cooperate with the teachers of given institution and the parent community in order to insure the wealth of the kids, and help them to, through their actual problems. The family orientated pedagogy is representing the wealth and development of the kids is insured the most if it is designed in cooperation with the family and the institution. A need of work with the family is appearing in our educational system through: school director-teacher-parent and school psychologist. The essence of the cooperation between school psychologist-teacher-parent is on trust, accommodation, flexibility, and respecting the competency of each other. > /
