Abstract: In present paper we present the main methods of *Reading and Writing for Critical Thinking* (RWCT) and some lessons in Physics and Literature planned in this topic. This strategy is based on constructivist learning theory (Vygotsky) and cooperating team working of the students. The methods develop the higher lever of thinking according to Bloom's taxonomy. The strategy steps are: *recall (the prior knowledge), the realization of meaning (the teaching face) and reflection (the application face), the RRR-frame.*

Keywords: active learning, cooperative learning, constructivism, metacognition, reasoning, critical thinking, creativity.
