**Abstract:** This paper considers the role of emotion regulation (i.e. extrinsic and intrinsic monitoring and adjusting of emotion) and emotion understanding (i.e. comprehension of the signs of, causes of, and ways to regulate emotion) in multi-risk childhood adjustment. A multilevel approach to social-workers-based intervention program is presented. The program is designed to address to needs of low-income children that present with a range of problem behavior and diverse developmental histories.

**Keywords:** Emotion comprehension, emotion regulation, criminality, behavior regulation.
