Abstract: The border guarding organization is a special kind of group with high level of formalism and hierarchy. This study aims to examine the status and status symbols in such an organization. My goal was to identify the relation between the respect of military rank, respect of interpersonal space, respect of military uniform and the time spent in the organization, age and military rank. To achieve this I used my own tools as there are no available standardized tools. I could demonstrate relation only between the respect of military rank and age and the respect of military uniform and rank.

Keywords: military organization, status, interpersonal space, military uniform
