

## **I N C L U E S**

### **CLUES TO INCLUSIVE AND COGNITIVE LEARNING ENHANCEMENT IN SCHOOLS**

#### **European Comenius Network Project**

The INCLUES project wants to create a network of educational professionals and parents working towards the realization of inclusive & cognitive education.

Inclusive education is defined as providing adapted, individually tailored education for all children in peer & age-related groups, across a variety of needs, abilities and levels of competences. It provides the necessary support within the normal classroom. It involves teaching children with learning difficulties (whatever their origin – social or disability) together with “normally” learning children.

Cognitive education aims to activate basic cognitive skills (involved in learning basic academic skills, as well as social, motor, artistic and emotional adaptive learning), in order to develop the capacity to learn how to learn, to find the “clues” of learning. Hence the name IN-CLUES.

The INCLUES network has been co-financed by the European Commission within the Comenius Programme, from 1 October 2003 until 31 December 2006.
